

# Katie Glover

## Front-End Developer with a background in illustration and design

Norwich, UK | 07479 211147 | [katieglover21@gmail.com](mailto:katieglover21@gmail.com) | [katieglover.vercel.app](https://katieglover.vercel.app) | [github.com/KatieMari](https://github.com/KatieMari) | [LinkedIn](#)

### PROFILE

I trained in fine art and illustration before moving into Creative Computing, so I approach interfaces as both a designer and a developer: sketching, prototyping in Figma, then building accessible, responsive experiences in React and React Native. Graduating summer 2027 and looking for a graduate or junior front-end role where I can keep learning from an experienced team.

### WHAT I BRING

- **A designer's eye in a developer.** Years of art and illustration training mean I notice spacing, typography and colour, and I can design a feature in Figma and then build it myself.
- **User-centred by habit.** I test with real people and act on what I learn, from children using Power Pals to a wider mix of voices and accents for a speech model.
- **Range and curiosity.** I've built for the web, mobile, VR and in-browser machine learning, and I'm comfortable picking up new tools quickly.

### TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript, TypeScript, C#

**Frameworks & libraries:** React, React Router, React Native, Expo, Node.js, Express, Chart.js, p5.js, ml5.js

**Design & UX:** Figma, wireframing, prototyping, style guides, user testing, responsive and accessible design

**Tools:** Git, GitHub, Vercel, VS Code, Unity, Teachable Machine

### SELECTED PROJECTS

**Power Pals** · Team of 5 · React Native, Expo Router, Figma

[Demo video](#)

- Designed every screen and the style guide for an energy-education app for children, then built most of it with reusable React Native components.
- Tested with children aged 6–11 and acted on feedback, adding a welcome screen and reordering navigation.

**My Water Footprint** · React, Vite, Chart.js, Node.js, Express, TypeScript

[Live site](#) · [Code](#)

- Built a full-stack water-use calculator: a five-page React front end and a TypeScript REST API returning a chart and personalised advice. Deployed both to Vercel and fixed refresh 404s with a routing rewrite rule.

**Voice-Controlled Soundboard** · ml5.js, p5.js, Teachable Machine

[Try it](#)

- Trained a speech recognition model, reduced accent bias with more varied training voices, and stopped false triggers with prediction locking and confidence thresholds.

**Instrumental** · React Native, TypeScript

[Code](#)

- Built a playable piano and drag-to-strum guitar using the Gesture Responder System, forwardRef with useImperativeHandle, and a custom orientation hook.

**VR Cat Café** · Unity, C#, XR Interaction Toolkit

[Demo video](#)

- Designed and built an explorable VR room with a custom vinyl player interaction, then decluttered the layout after headset testing.

### EDUCATION

**BSc (Hons) Creative Computing** · Norwich University of the Arts

2024 – 2027 (expected)

Full-stack web development, mobile apps, machine learning, AR/VR and physical computing.

**CertHE Illustration** · University of Derby

2020 – 2022

**A Levels & GCSEs** · Barnsley Sixth Form College, Netherwood Academy

A Levels: Fine Art (A), Graphic Communication (A); OCR Cambridge Technical in IT (Distinction). 9 GCSEs including Fine Art (9) and Maths (7).

### WORK EXPERIENCE

**Retail & Customer Service** · Clintons, Tesco, RGIS, City College Norwich

2021 – 2025

- Trained new team members, stayed calm and accurate through peak trading and high call volumes, and solved customer problems independently.

**Interests:** illustration and drawing, music and collecting vinyl, creative coding experiments, and cats.
